

## Quantity Limit Drug List

Quantity limits define the maximum amount of medication covered by your drug benefit for one prescription or copayment. This means your benefit covers a limited number of doses per prescription based on the medication's recommended dosing guidelines. If you or your physician requests an amount greater than the quantity limit of a medication, a prior authorization review may be required.

The goal of the Quantity Limit Program is to promote appropriate and cost-effective use of medications based on U.S. Food and Drug Administration (FDA) dosing guidelines, the medical literature and other factors.

This list is subject to change throughout the year. The presence of a drug on this list does not guarantee coverage and not all drugs included on this list may be covered by your pharmacy benefit plan. Coverage of medications is determined your benefit plan.

Analgesics	
<i>celecoxib (50 mg capsule, 100 mg capsule, 200 mg capsule, 400 mg capsule)</i>	60 / 30 DAYS
<i>diclofenac sodium 1% gel</i>	1000 / 30 days
